Dear Mr. Freeberg:

Re: Notices of Deficiency for SST System Closure/Corrective Action Work Plan
and
Simulated High-Level Slurry Treatment/Storage Unit Closure Plan

This letter is submitted pursuant to recent joint staff discussions, and is intended as a notification of document review extension under section 9.2 of the Hanford Agreement Action Plan.

Specifically, though Ecology is continuing to review the above noted documents, we are unable to complete adequately detailed review within time frames outlined under the Hanford Agreement. Consequently, we are hereby notifying you that High-Level Slurry Closure Plan comments will be submitted no later than January 15, 1990. Similarly, SST Closure and Work Plan comments will be submitted by February 28, 1990.

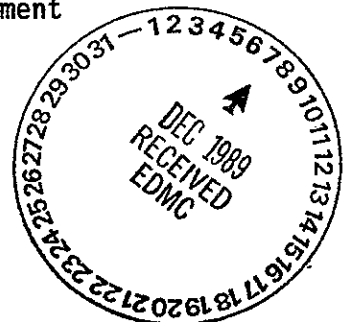

We anticipate that similar extensions will be avoided as Ecology and consultant staff grow. However, over the next few months additional extensions on similar projects will likely be unavoidable. Please be assured that any extensions will be kept to a minimum, and that potential impacts on Hanford Agreement milestones will be discussed with RL staff prior to notification.

Your understanding as we each gear up for implementation of the Hanford Agreement is appreciated.

Sincerely,

Roger Stanley
